

IT Human Resourcing

Due to customer demand, PicNet has created a function to provide selective IT recruitment and placement services:

- ✓ We have a proven edge in understanding current technologies, a proven methodology and our staff is the best example to showcase the kind of talent that we have recruited. This has led to our large clients continually approaching us to assist them in filling their internal IT vacancies.
- ✓ At PicNet our processes allow us to maximise the quality of candidates we interview and put forward to our clients. A Senior Manager who is an expert in the field is involved in the interview process. This is what makes the selection of our candidates superior.
- ✓ Our methodology enables us to scrutinise both behavioral and technical aspects of the candidates so that you can be assured of having only the best talents available.
- ✓ We ensure that candidates we put forward meet our client's organisational culture and fit. This helps ensure the longevity of the candidate in your workplace.

"It was definitely the quality of the people that set PicNet apart."

John Doran - Regional IS Director ANZ, Reckitt Benckiser

PicNet | People, Information and Collaboration Network

IT Support. Software Development. IT Consulting.

PicNet Pty Ltd - Ground Floor, 120 Christie Street, St Leonards NSW 2065
